Executive Summary

The CSI ten-county service area includes highly diverse levels of need based on education, employment, poverty, and health status.

- ***Educational attainment is highly correlated with poverty.*** Compared to both Texas and the U.S. more than 70% of the CSI counties have a high percentage of people age 25+ who have less than a high school degree.
- Nearly a quarter (23.2%) of those over the age of 25 in Navarro County have less than a high school education.
- ***Those who are unemployed are three to five times more likely to live in poverty.*** Data from the 2017 Texas Workforce Commission¹ suggests improvements since the comparative 5-Year Census data period ending 2016 noted above. Most of the counties CSI serve show an unemployment rate equal to or less than the overall rate for Texas (4.0%) from the Bureau of Labor Statistics for April 2018.²
- Unemployment rates in Henderson (4.2%), Hunt (3.9%) and Navarro (3.9%) remain higher than the rest of the service area.
- In Navarro and Henderson Counties, one- third of children live in poverty (less than 100% FPL) compared to the national percentage of just over 21%.
- Black/African American residents of each county are approximately twice as likely as Whites to live in poverty.

Despite the wide disparities in health rankings and poverty across the 10 counties CSI serves, overall, there has been positive social and economic change in nearly every county since the last study in 2015. The “Changes in Demographics” table on page 19 illustrates that:

- A higher percentage of people in every CSI county now have health insurance compared to 2015.
- More than half of the counties have improved access to care which is seen in the number of residents per primary care physician.
- Median incomes have improved in nearly every county and there is a slightly lower percentage of people living in poverty.

The huge correlation between income and health status is seen dramatically in the CSI service area.

- Collin County is at, or near, the top among all 254 Texas Counties on most Health Ranking measures. It also has a media income (\$86,188) nearly twice that of half of the counties in the CSI service area.
- Denton County with a median income of \$76,678 has the highest positive health outcomes and health factors in the state.
- Henderson County with a median income of \$43,434 ranks in the bottom half of most Texas’ counties’ health outcomes and health behaviors.

Positive Community Engagement

As described in the Community Needs Assessment Results Overview on page 10, there were over 500 individuals included in the CSI assessment including staff and board members. This positive engagement included input from over 25 agencies and other community organizations as well as public officials.

¹ <http://www.txcip.org/tac/census/morecountyinfo.php?MORE=1042>

² <https://data.bls.gov/timeseries/LASST480000000000003>

Continued and on-going engagement with stakeholders remains a high priority for CSI. Building awareness of the critical role community action agencies fill in the lives of many Texans will require outreach to key sectors. For example, despite multiple attempts by direct certified mail, phone, actual visits and e-mail to engage County Judges, their participation was limited or non-existent in several of the counties served by CSI.

Top Five Needs

Starting on page 20, the full report provides profiles of each of the 10 counties in the CSI service area. For each county there is a summary including:

- A service area description
- Research summaries
- Count-specific Needs Analysis
- County demographics

Based on the Crescendo and TDHCA research methodologies, the needs for each county were prioritized using the Strategic Grid Analysis (SGA) format.

Using the SGA, the top five needs are listed for each county. The SGA from Navarro County is provided below as an example.

Strategic Grid

County:		Navarro
High Community Impact Low	Affordable housing	Food Employment and community services for African Americans Help finding sources of affordable food Transportation
	Employment opportunities Help finding a job Affordable medical care Childcare Employment/economic assistance Health insurance/affordable medical care	
	Health insurance/Affordable medical care Housing & Rental Assistance	Financial Education/Budgeting Classes/Credit Counseling Help with job skills, training & job search
Low		High
CSI Implementation Feasibility		

Overall the CSI Community Needs Assessment illustrates that the needs do vary by county, but the compiled results suggest that the top five needs across all counties are:

- Education
- Transportation
- Childcare
- Food
- Housing & Rental assistance

The top needs can also be segmented by the CSBG Domain seen on page 102 and in the table below.

Summary of Top Five Needs – Total Service Area by CSBG Domain						
	Employment	Education and Cognitive Development	Infrastructure / Income / Asset Building	Housing	Health and Social / Behavioral Development	Civic Engagement and Community Involvement
1	Health insurance / Affordable medical care	Assistance to attend trade or technical school, or college	Financial education / Budgeting classes / Credit counseling	Affordable housing	Food	Crime awareness or crime reduction
2	Employment opportunities	Computer skills training	Transportation	Help to make my home more energy efficient (weatherization)	Programs and activities for youth (ages 12-18)	Public parks and facilities
3	Help finding a job	Adult education or night school	Legal services	Help with utility bills	Nutrition education / Healthy eating education workshops	Programs and activities for seniors
4	Help with job skills, training & job search	English as a second language classes	Finding child care	Help paying rent	Counseling services	Neighborhood clean-up projects
5	Assistance with goals and self-sufficiency	GED classes	Help with applying for Social Security, SSDI, WIC, TANF, etc.		Prescription assistance	Parenting classes

The full prioritized ranking of each county's needs and stakeholder partner recommendations is listed in the full report.

Background

Federal Requirements for Needs Assessments

In 2001, the U.S. Department of Health and Human Services ("USHHS") issued Information Memorandum 49, requiring eligible entities to conduct Community Needs Assessments and use the results to design programs to meet community needs. In 2015, USHHS issued Information Memorandum No. 138 establishing Community Services Block Grant (CSBG) Organizational Standards requiring CAAs to conduct a Community Needs Assessment and develop a Community Action Plan to address the needs identified in the assessment.

Community Action Agencies ("CAAs") must conduct three planning processes, as described and illustrated below:

1. A *Community Needs Assessment* ("CNA") every 3 years identifying community needs;
2. A *Strategic Plan* ("SP") every 5 years setting agency priorities and outcomes; and
3. A *Community Action Plan* ("CAP") every year identifying the plan to implement programs that meet the community needs.

CAA Planning Processes

According to the TDHCA guidance, at a minimum, CAAs must conduct Community Needs Assessments that meet the following requirements established by the CSBG Organizational Standards:

Summary of Community Needs Assessment Requirements

- Conduct the Needs Assessment every three years.
- Collect current poverty data and its prevalence related to gender, age, and race/ethnicity.
- Collect and analyze both qualitative and quantitative data on its service areas.
- Include key findings on the causes and conditions of poverty and the needs.
- Formal acceptance of the completed assessment by a governing board.
- Inform an outcome-based and anti-poverty focused Community Action Plan.
- Consider customer satisfaction data and input in the strategic planning process.

CSI asked Crescendo Consulting Group to help develop a comprehensive CNA on their behalf. The purpose of this document is to identify and prioritize community needs in order to help further refine outreach initiatives and support requests for funding and collaboration with other community-based organizations. In addition to meeting regulatory and funding requirements, the CNA will allow CSI to sustain and enhance services to the ten counties it services.

Organizational Profile

Agency Background

CSI began in Navarro County, Texas in 1966 as a Community Action Agency (non-profit), developed from the Economic Opportunity Act of 1965. CSI was founded with a mission to help clients – specifically, low-income citizens in rural areas achieve success and rewards through confidential case management, direct coordination of resources, support services, and peer celebration activities. A few years after its inception, it expanded from Navarro County into Ellis County. As additional projects were added (such as job training, weatherization, and other initiatives), the organization's service area expanded throughout rural east and central Texas counties. For a brief period, CSI served 42 counties in central and east Texas in order to assess the seasonal farm worker/migrant worker. The CSI service area is currently more focused and includes services offered in the following ten counties: Anderson, Collin, Denton, Ellis, Henderson, Hunt, Kaufman, Navarro, Rockwall, and Van Zandt.

CSI has been a continuous source of special program assistance to low-income citizens throughout Texas and serves as a constant contact for residents via phone, website, and regular mail with questions about services, as well as addressing various problems and needs. CSI's current major service lines include the following:

Community Services Block Grant/Direct Client Services (CSBG/DCS)

Funded by the Texas Department of Housing and Community Affairs (TDHCA), CSI provides administrative support and direct client services in Anderson, Collin, Denton, Ellis, Henderson, Hunt, Kaufman, Navarro, Rockwall, and Van Zandt counties. Particularly pertinent in the summer months due to storms and potential flooding, CSBG assistance is provided to clients in emergency, one-time assistance situations. Clients also receive comprehensive case management services requiring monthly meetings/updates with case managers to record outcomes, successes, and/or barriers to accomplishing established goals. Other typical uses of the assistance are used to support educational advancement (tuition, books, student housing, and fees) for people working to enhance job skills.

CSI services are particularly pertinent in the summer months due to storms and potential for flooding.

In addition to the major service lines noted above, since its inception, CSI has supported the communities that it serves in ways such as those shown below:

- Assisting with transportation services to provide service area residents with greater access to community services.
- In a three year period of logging over 1.2 million total miles on over 260k trips – collecting fares of \$300k – in the CSI Transit Services service line.
- In a three year period - Delivered over 90k meals to seniors, through Meals on Wheels Program.
- In a three year period - assisting 7,855 elder clients and 16,817 people with disabilities.

Community Services Block Grant Overview

CSI is funded by the Texas Department of Housing & Community Affairs as a CSBG Eligible Entity for Anderson, Collin, Denton, Ellis, Henderson, Hunt, Kaufman, Navarro, Rockwall, and Van Zandt, which includes both direct service and community partnerships. CSBG provides States, the District of

Columbia, the Commonwealth of Puerto Rico, U.S. Territories, Federal and State-recognized Indian Tribes and tribal organizations, Community Action Agencies, migrant and seasonal farm workers or other organizations designated by the States, funds to alleviate the causes and conditions of poverty in communities.

The Community Services Block Grant (CSBG) is a federal program administered by the U.S. Department of Health and Human Services, Office of Community Services. The funds provide assistance to states and local communities to alleviate poverty, revitalize communities and empower low-income families to become self-sufficient through a network of public and non-profit agencies. This CSBG network consists of more than 1,000 agencies that create, coordinate and deliver programs and services to low-income Americans in 99 percent of the nation's counties.

The program funds provide a range of services and activities to assist the needs of low-income individuals including the homeless, migrants and the elderly. Grant amounts are determined by a formula based on each State's and Indian Tribe's poverty population. Grantees receiving funds under the CSBG program are required to provide services and activities addressing employment, education, better use of available income, housing, nutrition, emergency services and/or health.

Grantees are statewide or local organizations, or associations with demonstrated expertise in providing training to individuals and organizations on methods of effectively addressing the needs of low-income families, and communities and organizations that are officially designated as a Community Action Agency (CAA) or a community action program under section 673(1) of the CSBG Act, as amended by the Human Service Amendments of 1994 (P.L. 103-252), and meets all requirements under section 673 (1) (A) and 676A of the CSBG Act, as amended by the COATES Human Services Reauthorization Act of 1998.

Board of Directors

The CSI leadership includes the following members of the Board of Directors:

Name	County	Sector	Office
Jeffery Cardell Enoch, Sr.	Henderson	Public	Secretary
Monetha Fletcher	Rockwall	Public	
Ruth Woods	Navarro	Public	
Rev. Dairy Johnson	Navarro	Private / Civic	President
Cedric Fields	Navarro	Private / Civic	Treasurer
Lakeshea Brown	Ellis	Private / Civic	Vice President
Andrea Griggs	Hunt	Client	
Graciela Hernandez	Ellis	Client	
Wallace Skipper, Jr.	Navarro	Client	

Community Needs Assessment Results Overview

The Community Services Block Grant (CSBG) Act requires States administering this grant to secure a Community Needs Assessment from CSBG eligible entities. Subrecipients must submit this Community Needs Assessment Results Overview along with a 2018 CSBG Community Needs Assessment (CNA) Report by June 1, 2018. CSI Referred to the Develop a CNA Report section in TDHCA guidance for creating the CNA report.

#	County	* Poverty Population	# of Residents Surveyed	# Clients Surveyed	# of Community Forum Held	# of Focus Group held	Title of Elected Officials Contacted	Name of Board Members Interviewed	Name of Organizations Interviewed

10	Van Zandt	15.7%	37	Included in the survey	1	1	Van Zandt County Judge Don Kirkpatrick		WIC

* Poverty Population according to the numbers published by the Community Commons website

Based on the execution of the research modalities listed above, the research results overview identifies the following top five needs for the aggregated service area:

- Transportation
- Food
- Housing assistance
- Education and job skills training
- Access to healthcare

The following sections provide county-level details on the needs listed above.

Community Needs Assessment Process Overview

Timeline and Data Collection Plan

The CSI approach to conducting the Community Needs Assessment is a component of a broader approach to continually evaluating and improving service quality and the ability to meet the needs of the underserved population in the 10-county service area.

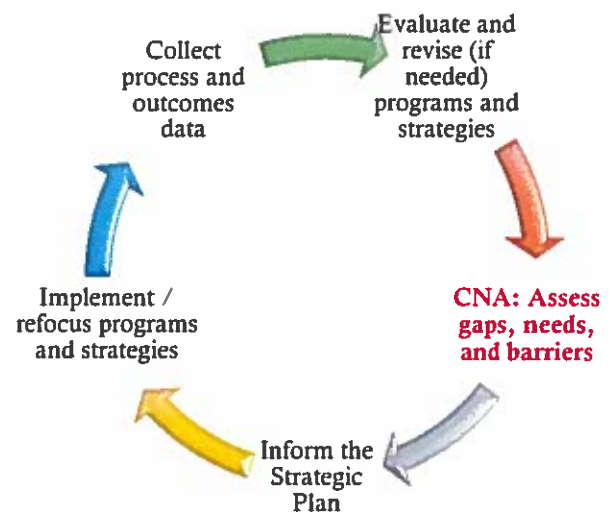

As shown in the graphic to the right, CSI uses the Community Needs Assessment to identify service gaps and opportunities to better address needs / barriers. The CNA informs the Strategic Plan and helps to drive revised programs and strategies. CSI then (and continually) collects data and evaluates program impact – identifying opportunities to further enhance program effectiveness.

The current CNA was conducted in March, April, and May 2018. The Data Collection Plan includes the following elements:

- Collecting and analyzing quantitative data from sources that include, but are not limited to, the U.S. Census Bureau, the U.S. Centers for Disease Control and Prevention, ESRI analytical services, the Robert Wood Johnson Foundation, “Healthy People 2020,” Community Commons, and the Texas Department of Health and Human Services.
- Using the quantitative data to inform and help set the context for collection and analysis of primary qualitative data.
- Collect and analyze primary and qualitative data using methods such as focus group discussions, one-on-one interview, community forums, and large sample surveys.
- The quantitative and qualitative data was aggregated and prioritized – yielding a broad-spectrum analysis that provided insightful lists of high priority needs by county and for the total service area (by CSBG domain).

Special efforts were made to engage and include the voices of low-income persons in the assessment. Multi-mode research methods were deployed in order to “cast a broad net” and include the most vulnerable. In addition to pro-actively reaching out to current clients of CSI, community partner agencies were asked to invite comments from the target groups, and telephone research utilized a screener section to include low-income persons on the phone and on-line.

Additional details of the approach are contained in the Data Collection Methods section.

Staff, Board Members, Partners, Community Member Involvement and Outreach

The CSI CNA methodology input from a broad spectrum of Staff members, Board Directors, community service partners, and community-at-large members. An enumeration of involvement from these sectors is shown below:

Group	Approximate Number or Description	Modality
Staff members	Approximately 25	One-on-one interviews
Board Directors	All	One-on-one interviews
Community service partners	Opinions from nearly 30 organizations were included representing the education, health service, community support, governmental, public safety, and industrial sectors	Focus groups Community Forums One-on-one interviews
Community-at-large members	Approximately 500	Large sample survey Focus groups Community Forums One-on-one interviews

During the CNA process, CSI continually sought out unique insight from individuals and organizations who could provide a broad spectrum of information regarding the needs of underserved populations and, in some instances, offer suggestions regarding collaboration or other approaches to addressing community needs and shared goals.

Data Collection Methods

To evaluate perceived needs, CSI reached out to a large number of clients, community members, community service providers, and other key stakeholders in the ten service area counties. Several research modes were deployed in order to “cast a broad net” and inclusively conduct a multi-tiered approach. Key research modes are listed below:

- Large sample community survey (see Appendices for the survey instrument)
- Client surveys (see Appendices for the survey instrument)
- One-on-one interviews with municipal- and county-level government officials (see Appendices for the interview guides)
- Focus groups (see Appendices for the focus group guide)
- Quantitative data analysis (see Appendices for several reference tables)
- One-on-one interviews with Board Members and other community stakeholders

Strategic Grids Prioritization Method

After the data was collected, the community needs identified by respondents were prioritized based, in part, on approaches supported by the U.S. Centers for Disease Control and Prevention (CDC); National Association of County and City Health Officials (NACCHO); and, others. In sum, the community needs identified in the various research modalities were placed in to a Strategic Grid Analysis (SGA) format. The SGA prioritization approach is recommended by NACCHO to prioritize a list of diverse county needs. A sample template of the SGA is shown below, and a detailed description of the SGA is contained in the Appendix.

SGAs are generally used to help agencies focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources.

The basic steps to an SGA are shown below:

- Select the axes for the grid. Given that CSI wants to identify the highest priority needs in each county for which it can (or could potentially) offer assistance, the criteria most relevant to the agency are impact (high impact/ low impact) and feasibility (low/ high likelihood that CSI could implement programs to address the need).
- Create a grid showing the four quadrants dictated by the grid axes. See example:

Strategic Grid

County:		Anderson
<div>High</div> <div>Community Impact</div> <div>Low</div>		
Low	CSI Implementation Feasibility	
		High

- Populate the grid

- Select prioritized needs based on the following criteria:
 1. Top priority: High Impact/High Feasibility – Those with high impact and high feasibility are the highest priority items.
 2. Second priority: High Impact/Low Feasibility – These tend to be long-term projects or ones that may benefit from collaboration with other organizations. They often include important community needs that must be addressed, but ones for which the agency may not be best suited to address the issue; or, the need may be out of the agency's purview.
 3. Third priority: Low Impact/High Feasibility – Often these include politically important and difficult-to-eliminate programs and services and/or ones that have a revenue neutral impact but help sustain employment for key employees.
 4. Fourth priority: Low Impact/Low Feasibility – These typically include community issues affecting a small subset of the population and are generally out of the agency's purview.
 5. Within each quadrant, needs are prioritized based on their prominence in the primary and secondary research.

Community Profile: Aggregated Service Area Scan

Population and key demographics

The ten-county CSI service area includes a highly diverse population of approximately 2.25 million people. As shown in the following table;

- Combined, Collin and Denton Counties comprise approximately 75% of the entire service area population.
- The median age across counties is fairly consistent in the mid- to upper 30s, yet in Henderson and Van Zandt Counties, the median age is over 43 years. This suggests that people in these areas may be more likely to benefit from health and transportation services.
- The service area has a strong representation of people who are ethnically Hispanic (10% to 20% in most counties).
- The African American population is most heavily concentrated in Anderson County.
- Median household income and education (i.e., "Percent with a Bachelor's Degree or Higher") are highly correlated.

Key Demographic Measures per CSI Service Area County

Measure	Texas	Anderson	Collin	Denton	Ellis	Henderson	Hunt	Kaufman	Navarro	Rockwall	Van Zandt	TOTAL
Population	26,956,435	57,772	886,633	754,650	160,225	79,213	89,068	111,830	48,177	88,010	53,070	2,328,648
Median Age	34.2	38.9	36.2	34.5	35.9	43.7	38.1	35.8	38.1	37.2	43.5	38.1
Median Household Income	\$54,727	\$42,146	\$86,188	\$76,678	\$64,382	\$43,434	\$45,643	\$60,179	\$43,388	\$89,161	\$46,555	\$59,775
Percent Living in Poverty ¹	16.7%	17.0%	7.1%	8.7%	11.0%	18.7%	18.8%	13.7%	19.9%	6.1%	15.7%	13.7%

Key Findings on Causes and Conditions of Poverty

Causes of Poverty per County

The Robert Wood Johnson Foundation (RWJF) has found that poverty and health are inseparable.³ National research by the RWJF, the CDC, the Institute for Healthcare Improvement, and others support the position that social determinants of health (SDH), drive poverty levels and – in turn – community health. The CDC Office of Disease Prevention and Health Promotion authored the seminal publication, “Healthy People 2020” in which they explore the social determinants that comprise healthy communities; in their work, poverty is one of the core tenets of good health.⁴ According to the CDC, the social determinants of health include the following:

Social Determinant	Subfactors / Correlative Factors	
Economic Stability	Poverty Employment	Food Security Housing Stability
Education	High School Graduation Language and Literacy	Enrollment in Higher Education Early Childhood Education and Development
Social and Community Context	Social Cohesion Perceptions of Discrimination and Equity	Civic Participation Incarceration/Institutionalization
Health and Health Care	Access to Health Care Health Literacy	Access to Primary Care
Neighborhood and Built Environment	Access to Healthy Foods Crime and Violence	Quality of Housing Environmental Conditions

The community needs identified and prioritized in this assessment are driven by the SDHs (including poverty) shown above. CSI programs provide services to community residents in poverty and/or otherwise disadvantaged. All services impact SDH or correlative factors.

Available from: <http://www.healthypeople.gov/2010/hp2020/advisory/SocietalDeterminantsHealth.htm>

Conditions of Poverty per County

The TDHCA and CSI share a particular concern for addressing the needs of underserved populations – particularly those in poverty. Again, the CSI service area includes highly diverse levels of poverty. For example, in Rockwall and Collin Counties, fewer than one in ten people have household incomes less than 100% of the Federal Poverty Level (FPL) while in Navarro, Henderson, Anderson, and Hunt Counties, approximately one in five people live in poverty. There are demographically higher rates of poverty within counties, as well.

Poverty Analysis by CSI Service Area County											
Measure	Counties										
	Texas	Anderson	Collin	Deaton	Ellis	Henderson	Hunt	Kaufman	Navarro	Rockwall	Van Zandt
Population for whom poverty status is determined	16.7%	17.1%	7.1%	8.7%	11.0%	18.8%	18.9%	13.7%	19.9%	6.2%	15.8%
AGE											
Under 18 years	23.9%	26.0%	8.7%	10.0%	15.2%	30.9%	26.1%	18.5%	31.2%	7.6%	24.0%
Related children under 18 years	23.7%	25.7%	8.5%	9.8%	15.0%	30.8%	25.9%	18.3%	30.9%	7.4%	22.9%

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates.

Note: Population for whom poverty status is determined will vary +/- 1% from Census, 2012-2015 data and Community Commons data.

- In Henderson and Navarro Counties, 30% of children live in poverty (less than 100% FPL) compared to the national percentage of just over 21%.
- Black/African American residents of each county are approximately twice as likely as Whites to live in poverty.
- Poverty incidence is highly correlated with educational attainment. Compared to both Texas and the U.S. more than 70% of the CSI counties have a high percentage of people age 25+ who have less than a high school degree.
- Those who are unemployed are three to five times more likely to live in poverty. Data from the Texas Workforce Commission suggests improvements since the comparative 5-Year Census data period ending 2016 noted above. Most of the counties CSI serve show an unemployment rate equal to or less than the overall rate for Texas (4.0%) from the Bureau of Labor Statistics for April 2018.

The following section describes some of the conditions and causes of poverty in each of the CSI service area counties and elsewhere.

Poverty and At-Risk Measures per CSI Service Area County

Despite the wide disparities in health rankings and poverty across the 10 counties CSI serves, overall, there has been positive social and economic change in nearly every county. As the change table on the following page illustrates:

- A higher percentage of people in every county have health insurance.
- More than half of the counties have improved access to care as illustrated by the ratios of residents to primary care physicians.
- Median incomes have improved in nearly every county and there is a slightly lower percentage of people living in poverty.

Profile for Each County

Anderson County

Service area description

Located southeast of Dallas, Anderson County has a population of 57,772. The median household income is \$42,146, with 17.0% of the population being below poverty levels. More than 80% of residents over 25 have a high school education and more than 10% have a college degree.

Agriculture, manufacturing, product distribution, and tourism are the primary industries in Anderson County. The county attracts numerous visitors to Dogwood Trails, balloon launchings, train rides on the Texas State Railroad, the Engeling Wildlife Management Area, and other historic sites. A county map⁵ inset and key demographic, service line, and community needs data is shown below.

	<p>Key facts</p> <p>Population: 57,772 Median Age: 39.5 Median Household Income: \$42,146 Percent Living in Poverty^{**}: 17.0% Ethnicity % White: 60.0% % African American: 21.2% % Hispanic: 17.0% Diversity Index⁶: 68.2 Percent with Bachelor's Degree or higher: 11.8% Percent 16+ unemployed: 4.2%</p>

^{**} (i.e., Percent with income 100% of the Federal Poverty Level or less)

Research summary

In order to determine the community needs for Anderson County, CSI implemented a multi stage methodology that included the following:

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials

⁵ Google, Inc.; Google Maps, www.google.com, 2015. Used for all summary table maps.

⁶ 2017 Projections from the U S Census Bureau. <https://bao.arcgis.com/esriBAO/index.html#>

- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 17 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Transportation
2. Public infrastructure and safety
3. Employment /Economic assistance
4. Education
5. Childcare

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Median Household Income: \$42,146										
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates										

- Nearly 42% of Anderson County's household incomes are less than \$34,000.
- One out of five (17.1%) of the population are below the federal poverty line, the second highest in CSI's service area.

Social & Economic Factors	Texas	Anderson County
Median household income	\$54,727	\$42,146
Children eligible for free lunch	58.9%	61.2%
High school graduation	82.4%	80.2%
Some college	66.7%	50.7%
Unemployment	4.5%	4.2%
Children in poverty	23.9%	25.9%
Income inequality	4.9	4.4
Children in single-parent households	33%	34%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		
Social associations ⁸	7.6	10.6
Violent crime ⁹	408	320
Injury deaths ¹⁰	37.5	44.3
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- High school graduation rates in Anderson County are just under the Texas average of 82%.
- More than half of Anderson County school children are eligible for free lunch.

Physical Environment	Texas	Anderson County
Air pollution - particulate matter ¹¹	8.0	9.2
Drinking water violations ¹²		No
Severe housing problems	18%	15%
Driving alone to work	80%	85%
Long commute - driving alone	37%	24%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot/counties		

- Even though it is below the Texas average of 18%, one on seven (15%) of Anderson County residents indicates that they have severe housing problems.
- Fewer Anderson County residents have long commutes than the Texas average

The rankings help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of

⁸ Number of associations (membership organizations) per 10,000 population.

⁹ Violent crimes reported per 100,000 population.

¹⁰ Number of deaths from intentional and unintentional injuries per 100,000 population.

¹¹ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

¹² A "Yes" indicates that at least one community water system in the county received a violation during the specified time frame, while a "No" indicates that there were no health-based drinking water violations in any community water system in the county.

communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

Among Texas counties, Anderson County ranks below the median on most health outcomes and healthy behavior factors.

Health Ranking Summary Table	
Anderson County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	183
Length of Life	208
Quality of Life	107
Health Behaviors	231
Clinical Care	71
Social and Economic Factors	143
Physical Environment	127
Source: County Health Rankings 2018 Texas Summary Report	

Health Behaviors	Texas	Anderson County
Adult smoking	16.5%	21.6%
Adult obesity	27.9%	31.4%
Food environment index ¹³	6.0	5.7
Physical inactivity	22.9%	25.4%
Access to exercise opportunities	81%	34%
Excessive drinking	15.8%	26.2%
Alcohol-impaired driving deaths	28%	21%
Sexually transmitted infections ¹⁴	523	355
Teen births ¹⁵	55	68.8
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Obesity is a key driver for many chronic diseases and other health conditions. Anderson County residents are more likely to be obese than the Texas average.
- Behaviors related to physical activity in Anderson County are disadvantageous compared to the Texas average.

¹³ The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

¹⁴ Rate per 100,000 people.

¹⁵ Rate per 100,000 people.

Clinical Care	Texas	Anderson County
Uninsured	19.3%	15.7%
Primary care physicians	1,670:1	2,880:1
Dentists	1,790:1	2,750:1
Mental health providers	1,010:1	2,410:1
Preventable hospital stays ¹⁶	54.3	64.3
Diabetic monitoring	83.8%	84.2%
Mammography screening	57.9%	58.7%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- The concentration of healthcare providers in Anderson County is much lower than the State average.
- Behavioral health providers are also particularly lacking in this area versus the State average.

Health Outcomes	Texas	Anderson County
Diabetes	9.1%	11.3%
HIV prevalence ¹⁷	345.8	482.7
Premature age-adjusted mortality ¹⁸	6,700	10,100
Infant mortality ¹⁹	6.2	5.6
Child mortality ²⁰	17.3	11.2
Source: U.S. Bureau of Census, Bureau of Vital Statistics, Texas Department State Health Services		

- Consistent with higher obesity rates, diabetes rates are high, as 11.3% of adults report being diagnosed with the disease – higher than the Texas and U.S. average
- HIV incidence is higher in Anderson County than in Texas as a whole.

¹⁶ Per 1,000 fee-for-service Medicare enrollees.

¹⁷ Per 100,000 population

¹⁸ Years of potential life lost before age 75 per 100,000 population (age-adjusted)

¹⁹ Per 1,000 live births

²⁰ Rate per 100,00 children aged 1-14

Other Food Security and Health Factors	Texas	Anderson County
Food insecurity	17.0%	20.1%
Low access to food	27.0%	32.4%
Motor vehicle crash deaths	13.6	20.9
Drug poisoning deaths ²¹	N/A	10.7
Uninsured adults	23.3%	22.6%
Uninsured children	10.0%	11.4%
Health care costs ²²	\$11,121	\$11,804
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- One in five Anderson County residents report some degree of food insecurity; this equates to over 11,000 people.
- Anderson County has 3% more food insecurity than the Texas average.

²¹ Per 100,000 population

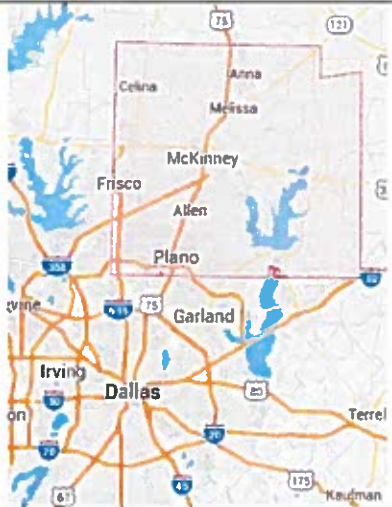

²² Amount of price-adjusted Medicare reimbursements per enrollee

Collin County

Service area description

Collin County ranks as one of the top growth areas in the state and the nation. Collin County's population is 886,633 and is predicted to reach an estimated 1.2 million by 2030. County government is expanding the infrastructure in response.

The education level of the county's workforce is nearly twice state and U.S. averages for degreed workers. 50% have a bachelor's degree or higher and more than nine out of ten workers 25 and older have a high school diploma). The poverty level is 7.1%. A county map inset and key demographic, service line, and community needs data is shown below.

	Key facts Population: 886,633 Median Age: 36.2 Median Household Income: \$86,188 Percent Living in Poverty**: 7.1% Ethnicity % White: 60.1% % African American: 9.1% % Hispanic: 15.0% Diversity Index: 64.9 Percent with Bachelor's Degree or higher: 50.2% Percent 16+ unemployed: 3.2%
Primary services offered 1. CSBG services 2. Utility assistance 3. Home weatherization	Top five needs 1. Employment / Economic assistance 2. Education 3. Transportation 4. Childcare 5. Programs and activities for youth (ages 12-18)

** (i.e., Percent with income 100% of the Federal Poverty Level or less)

Research summary

In order to determine the community needs for Collin County, CSI implemented a multi stage methodology that included the following:

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials
- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 18 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Employment / Economic assistance
2. Education
3. Transportation
4. Childcare
5. Programs and activities for youth (ages 12-18)

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Strategic Grid

County:		Collin	
High Community Impact Low	Employment opportunities Childcare Employment / Economic assistance	Food Education Lifestyle - long commute	
	Health insurance / Affordable medical care Programs and activities for youth (ages 1-18) Environmental quality - air Home maintenance Housing & Rental Assistance Lifestyle – Social Opportunities Programs and activities for seniors Public infrastructure and safety Youth services	Help finding a job Senior outreach and social engagement	
Low		High	
CSI Implementation Feasibility			

County demographics

Key measures

Collin County has the largest population of any CSI service area counties. Compared to other counties in the CSI service area, Collin County is very well off, yet there are some indications for needed services.

Key Measures	
Measure	Collin
Population	886,633
Median Age	36.2
Median Household Income	\$86,188
Percent Living in Poverty:	7.8%
Ethnicity	
% White	60.1%
% African American	9.1%
% Hispanic	15.0%
Percent with Bachelor's Degree or higher	51.2%
Percent 16+ unemployed	3.2%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- The median age (36.2) reflects a fairly young population.
- Relatively high median household income and lower median ages suggest a lower need to health and educational services. However, there are pocket of high-need areas within Collin County (i.e., in the east Plano / east Collin County areas).

Demographic and health measures

The following tables²³ show detailed demographic data on measures such as:

- Age
- Gender
- Ethnicity
- Household income
- Social and economic factors
- Physical environment factors

²³ Robert Wood Johnson Foundation, 2015.

- Health rankings
- Healthy behaviors
- Clinical care
- Health outcomes
- Other food security and health factors

Total	Age			Gender	
	Below 18	18-64	65 and older	Male	Female
886,633	27.2%	63.1%	9.7%	49.0%	51.0%

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- Gender in Collin County is evenly distributed.
- With approximately one out of ten (9.7%) residents over the age of 65, Collin County is one of the youngest counties in CSI's service area.

Total	Ethnicity					Diversity Index
	White	African American	Asian	Hispanic	Other	
886,633	60.1%	9.1%	12.0%	15.0%	3.8%	64.9

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- Collin County has a much larger Asian population (12.0%) than CSI's service area average.
- Approximately one out of seven residents (15%) are Hispanic, just below CSI's service area average (17.4%).

Total Housing Units	Household Income									Poverty
	Less than \$15k	\$15k to \$24k	\$25k to \$34k	\$35k to \$49k	\$50k to \$74k	\$75k to \$99k	\$100k to \$149k	\$150k to \$199k	\$200k or more	Percent Below 100% FPL

Median Household Income: \$86,188

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- Collin County has the second highest median household income in CSI's service.
- Three of four households (73%) in Collin County have an income of more than \$50,000.

Social & Economic Factors	Texas	Collin County
High school graduation	82.4%	93.6%
Some college	66.7%	62.1%
Unemployment	4.5%	3.2%
Children in poverty	23.9%	8.7%
Income inequality	4.9	4.0
Children in single-parent households	33%	20%
Social associations ²⁴	7.6	6.4
Violent crime ²⁵	406.2	153.6
Injury deaths ²⁶	37.5	27.9
Median household income	\$54,727	\$86,188
Children eligible for free lunch	58.9%	23.8%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Poverty, crime, and crime measures in Collin County are better than the Texas average.
- The number of associations in which individuals are involved is highly correlated to general well-being. Collin County is below the Texas average indicating a slightly greater risk for individuals to be less engaged in their communities.
- Median household income is well above the Texas average.

Physical Environment	Texas	Collin County
Air pollution - particulate matter ²⁷	8.0	10.8
Drinking water violations ²⁸		No
Severe housing problems	18%	13%
Driving alone to work	80%	81%
Long commute - driving alone	37%	46%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot?counties=48_001%2B48_085%2B48_121%2B48_139%2B48_213%2B48_231%2B48_257%2B48_349%2B48_397%2B48_467		

- Drinking water is excellent in Collin County.

²⁴ Number of associations (membership organizations) per 10,000 population.

²⁵ Violent crimes reported per 100,000 population.

²⁶ Number of deaths from intentional and unintentional injuries per 100,000 population.

²⁷ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

²⁸ A "Yes" indicates that at least one community water system in the county received a violation during the specified time frame, while a "No" indicates that there were no health-based drinking water violations in any community water system in the county.

- Collin County residents have a relatively long drive to work which increases the risk of automobile accidently and reduces the amount of time at home / leisure.

The health rankings (below) help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

Among Texas counties, Collin County is at, or near, the top among all Texas Counties on most Health Ranking measures.

Health Ranking Summary Table	
Collin County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	4
Length of Life	1
Quality of Life	16
Health Behaviors	3
Clinical Care	1
Social and Economic Factors	1
Physical Environment	160
Source: County Health Rankings 2018 Texas Summary Report	

- Although most rankings are strong, there appear to be challenges related to the physical environment.

Health Behaviors	Texas	Collin County
Adult smoking	16.5%	9.4%
Adult obesity	27.9%	24.2%
Food environment index ²⁹	6.0	7.7
Physical inactivity	22.9%	19.5%
Access to exercise opportunities	81%	91%
Excessive drinking	15.8%	12.5%
Alcohol-impaired driving deaths	28%	36%
Sexually transmitted infections ³⁰	523	553
Teen births ³¹	55	20.3
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Many Healthy Behavior measures show an advantage for Collin County versus the state average.

²⁹ The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

³⁰ Rate per 100,000 people.

³¹ Rate per 100,000 people.

Clinical Care	Texas	Collin County
Uninsured	19.3%	11.8%
Primary care physicians	1,670:1	1,060:1
Dentists	1,790:1	1,500:1
Mental health providers	1,010:1	1,030:1
Preventable hospital stays ³²	54.3	47.7
Diabetic monitoring	83.8%	88.4%
Mammography screening	57.9%	65.4%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Providers to population ratios are better in Collin County than then Texas average except for mental health providers; in this case, the availability of providers is slightly worse than the State average.

Health Outcomes	Texas	Collin County
Diabetes	9.1%	8.1%
HIV prevalence ³³	345.8	165
Premature age-adjusted mortality ³⁴	6,700	4,000
Infant mortality ³⁵	6.2	4.5
Child mortality ³⁶	17.3	14.8
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Although diabetes rates are below the state average, diabetes still impacts a large percentage of the population (8.1%).

³² Per 1,000 fee-for-service Medicare enrollees.

³³ Per 100,000 population

³⁴ Years of potential life lost before age 75 per 100,000 population (age-adjusted)

³⁵ Per 1,000 live births

³⁶ Rate per 100,00 children aged 1-14

Other Food Security and Health Factors	Texas	Collin County
Food insecurity	17.0%	16.4%
Low food access	27.0%	22.2%
Motor vehicle crash deaths	13.6	6.8
Drug poisoning deaths ³⁷	N/A	7.7
Uninsured adults	23.3%	13.0%
Uninsured children	10.0%	6.6%
Health care costs ³⁸	\$11,121	\$11,575
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Food security and related issues are generally better in Collin County than in Texas generally.
- Health care costs are slightly higher in Collin County than the Texas average.

³⁷ Per 100,000 population

³⁸ Amount of price-adjusted Medicare reimbursements per enrollee

Needs analysis

Based on the research methodologies described above, approximately 17 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Housing & Rental Assistance
2. Transportation
3. Affordable medical care
4. Job training

5. Mental health services Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Strategic Grid

County:		Denton	
High	Community Impact	Crime awareness or crime reduction	Financial education / Budgeting classes / Credit counseling
		Employment opportunities	Education
Affordable medical care		Job skills training	
Bilingual education and services		Job training	
Employment opportunities		Mental health services	
Low	Scholarships and education funds for college	Transportation	
		Utility assistance	
	Health insurance / Affordable medical care		
	Help to make my home more energy efficient		
	Housing & Rental Assistance		
	Lifestyle - Social opportunities		
		CSI Implementation Feasibility	
		Low	High

County demographics

Key measures

Denton County has the second largest population of any CSI service area counties. It also has the youngest median age.

Key Measures	
Measure	Denton
Population	754,650
Median Age	34.5
Median Household Income	\$75,099
Percent Living in Poverty:	8.7%
Ethnicity	
% White	61.60%
% African American	8.80%
% Hispanic	18.90%
Percent with Bachelor's Degree or higher	42.20%
Percent 16+ unemployed	3.70%

Social associations ⁴⁰	7.6	5.9
Violent crime ⁴¹	406.2	171.0
Injury deaths ⁴²	37.5	24.8
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Fewer children in Denton County are eligible for free lunch than the Texas average.
- Three out of four residents (76.6%) have had some college education.
- The high school graduation rate is above the Texas average.
- Denton County has a much lower violent crime rate than the Texas average.

Physical Environment	Texas	Denton County
Air pollution - particulate matter ⁴³	9.5	10.3
Drinking water violations ⁴⁴		Yes
Severe housing problems	18%	14%
Driving alone to work	80.3%	80.7%
Long commute - driving alone	37%	47%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot?counties=48_001%2B48_085%2B48_121%2B48_139%2B48_213%2B48_231%2B48_257%2B48_349%2B48_397%2B48_467		

- Severe housing problems are slightly less prevalent in Denton County than the Texas average.
- More residents travel long distances alone than the Texas average.

⁴⁰ Number of associations (membership organizations) per 10,000 population.

⁴¹ Violent crimes reported per 100,000 population.

⁴² Number of deaths from intentional and unintentional injuries per 100,000 population.

⁴³ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

⁴⁴ A "Yes" indicates that at least one community water system in the county received a violation during the specified time frame, while a "No" indicates that there were no health-based drinking water violations in any community water system in the county.

Similar to Collin County, Denton County has the highest positive health outcomes and health factors in the state. Only the physical environment ranks relatively low.

Health Ranking Summary Table	
Denton County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	1
Length of Life	2
Quality of Life	2
Health Behaviors	8
Clinical Care	10
Social and Economic Factors	17
Physical Environment	228

- More residents in Ellis County drive long commutes alone than the Texas average.
- Ellis County has less severe housing problems than the Texas average.

Health Ranking Summary Table	
Ellis County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	26
Length of Life	43
Quality of Life	41
Health Behaviors	44
Clinical Care	51
Social and Economic Factors	17
Physical Environment	218
Source: County Health Rankings 2018 Texas Summary Report	

The rankings help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

⁵⁹ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

⁶⁰ A "Yes" indicates that at least one community water system in the county received a violation during the specified time frame, while a "No" indicates that there were no health-based drinking water violations in any community water system in the county.

Health Behaviors	Texas	Ellis County
Adult smoking	16.5%	13.3%
Adult obesity	27.9%	29.4%
Food environment index ⁶¹	6.0	7.4
Physical inactivity	22.9%	23.9%
Access to exercise opportunities	81%	67%
Excessive drinking	15.8%	19.4%
Alcohol-impaired driving deaths	28%	33%
Sexually transmitted infections ⁶²	523	379
Teen births ⁶³	55	43
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Excessive drinking in Ellis County is higher than the Texas average.
- Sexually transmitted diseases are less prominent in Ellis County than the State average.

Clinical Care and Rank	Texas	Ellis County
Uninsured	19.3%	16.6%
Primary care physicians	1,670:1	2,410:1
Dentists	1,790:1	3,180:1
Mental health providers	1,010:1	1,640:1
Preventable hospital stays ⁶⁴	54.3	54.7
Diabetic monitoring	83.8%	87.0%
Mammography screening	58.9%	62.6%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- The concentration of healthcare providers in Ellis County is lower than the State average.
- Dentists are also particularly lower in this area than the State average.

⁶¹ The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

⁶² Rate per 100,000 people.

⁶³ Rate per 100,000 people.

⁶⁴ Per 1,000 fee-for-service Medicare enrollees.

Health Outcomes	Texas	Ellis County
Diabetes	9.1%	9.3%
HIV prevalence ⁶⁵	345	122
Premature age-adjusted mortality ⁶⁶	6,330	6,536
Infant mortality ⁶⁷	6.2	6.2
Child mortality ⁶⁸	17.3	21.5
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Consistent with the lower prevalence of all sexually transmitted diseases in Ellis County, the rate of HIV prevalence is also lower than the Texas average.

Other Food Security and Health Factors	Texas	Ellis County
Food insecurity	17.0%	15.8%
Low food access	27.0%	34.0%
Motor vehicle crash deaths	13.6	12.8
Drug poisoning deaths ⁶⁹	N/A	6.5
Uninsured adults	23.3%	20.5%
Uninsured children	10%	12%
Health care costs ⁷⁰	\$11,121	\$11,349
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- There is higher rate of low food access (34%) in Ellis County than the Texas average (27%).
- Ellis County has fewer uninsured residents than the Texas average.
- There are slightly more uninsured children in Ellis County than the Texas Average.

⁶⁵ Per 100,000 population

⁶⁶ Years of potential life lost before age 75 per 100,000 population (age-adjusted)

⁶⁷ Per 1,000 live births

⁶⁸ Rate per 100,00 children aged 1-14

⁷⁰ Amount of price-adjusted Medicare reimbursements per enrollee

Henderson County

Service area description

Henderson County is comprised of 79,213 people. Out of those people, the racial make-up of the county includes: 79.3% White, 11.8% Hispanic, and 6.5% African American. The county has a higher population living in poverty at 18.7% and only 17.5% having a Bachelor's degree or higher. The median household income for Henderson County is \$43,434 and just over a quarter of workers are employed in sales, office, and administrative support jobs.

The western part of the county is bordered by the Trinity River and the Neches River borders the east. Athens is the largest city. A county map inset and key demographic, service line, and community needs data is shown below.

	Key facts Population: 79,213 Median Age: 43.7 Median Household Income: \$43,434 Percent Living in Poverty**: 18.7% Ethnicity % White: 79.3% % African American: 6.5% % Hispanic: 11.8% Diversity Index: 45.3 Percent with Bachelor's Degree or higher: 17.5% Percent 16+ unemployed: 3.6%

** (i.e., Percent with income 100% of the Federal Poverty Level or less)

Research summary

In order to determine the community needs for Henderson County, CSI implemented a multi stage methodology that included the following:

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials
- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 18 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Education
2. Case management
3. Transportation
4. Food
5. Housing & Rental Assistance

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Driving alone to work	80.3%	80.8%
Long commute - driving alone	37%	41%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot?counties=48_001%2B48_085%2B48_121%2B48_139%2B48_213%2B48_231%2B48_257%2B48_349%2B48_397%2B48_467		

- Physical environment measures in Hunt County are consistent with the state average.

⁸⁸ Number of associations (membership organizations) per 10,000 population.

⁸⁹ Violent crimes reported per 100,000 population.

⁹⁰ Number of deaths from intentional and unintentional injuries per 100,000 population.

⁹¹ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

⁹² A "Yes" indicates that at least one community water system in the county received a violation during the specified time frame, while a "No" indicates that there were no health-based drinking water violations in any community water system in the county.

Health Ranking Summary Table	
Hunt County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	159
Length of Life	162
Quality of Life	152
Health Behaviors	147
Clinical Care	66
Social and Economic Factors	134
Physical Environment	224
Source: County Health Rankings 2018 Texas Summary Report	

The rankings help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

Health Behaviors	Texas	Hunt County
Adult smoking	16.5%	31.7%
Adult obesity	27.9%	26.6%
Food environment index ⁹³	6.0	6.8
Physical inactivity	22.9%	22.5%
Access to exercise opportunities	81%	61%
Excessive drinking	15.8%	22.7%
Alcohol-impaired driving deaths	28%	22%
Sexually transmitted infections ⁹⁴	523	430
Teen births ⁹⁵	55	54
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- A larger percentage of adult residents in Hunt County smoke and drink excessively than the Texas average.
- Hunt County has less access to exercise opportunities than the State average.

⁹³ The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

⁹⁴ Rate per 100,000 people.

⁹⁵ Rate per 100,000 people.

Clinical Care and Rank	Texas	Hunt County
Uninsured	19.3%	19.0%
Primary care physicians	1,670:1	3,100:1

Kaufman County

Service area description

Kaufman County is located in the Dallas-Fort Worth-Arlington, Texas Metropolitan Statistical Area and is comprised of 788 square miles of the Blackland Prairie region. The county has a population of 111,830 and the racial make-up includes 67.6% White, 19.2% Hispanic, and 9.9% African American. This county has a medium household income of \$60,179 with 13.7% living in poverty. A county map inset and key demographic, service line, and community needs data is shown below.

	<p>Key facts</p> <p>Population: 111,830 Median Age: 35.8 Median Household Income: \$60,179 Percent Living in Poverty**: 13.7%</p> <p>Ethnicity</p> <p>% White: 67.6% % African American: 9.9% % Hispanic: 19.2% Diversity Index: 60.2 Percent with Bachelor's Degree or higher: 19.4 Percent 16+ unemployed: 4.6%</p>

** (i.e., Percent with income 100% of the Federal Poverty Level or less)

Research summary

In order to determine the community needs for Kaufman County, CSI implemented a multi stage methodology that included the following:

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials
- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 20 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Education
2. Housing & Rental Assistance
3. Transportation
4. Food
5. Affordable housing

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Rockwall County

Service area description

Rockwall County is the smallest county in Texas, covering only 147 square miles. Regardless of its size, it has a higher than average population of 88,010 and a racial makeup of 72.8% White, 16.7% Hispanic, and 5.5% African American. Rockwall County has a higher than average median household income of \$89,161. It has a relatively low 6.1% living in poverty and a majority of those who are working are employed in sales, office, administrative, management, business, or finance occupations.

The county and city are named for a wall-like subterranean rock formation that runs throughout the county. In 2010, it was one of the top 25 fastest growing counties in the U.S. A county map inset and key demographic, service line, and community needs data is shown below.

	Key facts Population: 88,010 Median Age: 37.2 Median Household Income: \$89,161 Percent Living in Poverty**: 6.1% Ethnicity % White: 72.8% % African American: 5.5% % Hispanic: 16.7% Diversity Index: 52.4 Percent with Bachelor's Degree or higher: 38.0% Percent 16+ unemployed: 3.7%
Primary services offered <ol style="list-style-type: none"> 1. CSBG services 2. Utility assistance 3. Home weatherization 	Top five needs <ol style="list-style-type: none"> 1. Housing & Rental Assistance 2. Education 3. Transportation 4. Childcare 5. Home maintenance

** (i.e., Percent with income 100% of the Federal Poverty Level or less)

Research summary

In order to determine the community needs for Rockwall County, CSI implemented a multi stage methodology that included the following:

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials
- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 18 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Housing & Rental Assistance
2. Education
3. Transportation
4. Childcare
5. Home maintenance

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact

Children in single-parent households	33%	18%
Social associations ¹³⁷	7.6	7.5
Violent crime ¹³⁸	406	93
Injury deaths ¹³⁹	37.5	27
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- One in four children in Rockwall County is eligible for free lunch.
- High school graduation in Rockwall County is higher than the Texas average.
- The percentage of children living in poverty is much lower than the Texas average.
- Rockwall County has a significantly lower violent crime rate than the State overall.

Physical Environment	Texas	Rockwall County
Air pollution - particulate matter ¹⁴⁰	9.5	9.9
Drinking water violations ¹⁴¹		No
Severe housing problems	18%	15%
Driving alone to work	80.3%	82.7%
Long commute - driving alone	37%	59%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot?counties		

- Rockwall County has lower severe housing problems than the Texas Average.
- More than half of residents in Rockwall County have a long driving commute alone.

¹³⁷ Number of associations (membership organizations) per 10,000 population.

¹³⁸ Violent crimes reported per 100,000 population.

¹³⁹ Number of deaths from intentional and unintentional injuries per 100,000 population.

¹⁴⁰ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

¹⁴¹

Health Ranking Summary Table	
Rockwall County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	7
Length of Life	10
Quality of Life	13
Health Behaviors	11
Clinical Care / Access	3
Social and Economic Factors	2
Physical Environment	171
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates	

The rankings help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

Health Behaviors	Texas	Rockwall County
Adult smoking	16.5%	N/A
Adult obesity	27.9%	24.8%
Food environment index ¹⁴²	6.0	8.0
Physical inactivity	22.9%	23.7%
Access to exercise opportunities	81%	88%
Excessive drinking	15.8%	N/A
Alcohol-impaired driving deaths	28%	28%
Sexually transmitted infections ¹⁴³	523	218
Teen births ¹⁴⁴	55	21
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Residents in Rockwall County have more access to exercise opportunities than the State.
- One of four adults in Rockwall County is obese.
- The teen birth rate is more than 50% lower than the Texas average.

¹⁴² The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

¹⁴³ Rate per 100,000 people.

¹⁴⁴ Rate per 100,000 people.

Clinical Care	Texas	Rockwall County
Uninsured	19.3%	11.7%
Primary care physicians	1,670:1	1,300:1
Dentists	1,790:1	1,220:1
Mental health providers	1,010:1	890:1
Preventable hospital stays ¹⁴⁵	54.3	53.5
Diabetic monitoring	83.8%	87.3%
Mammography screening	57.9%	65.9%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- The concentration of healthcare providers in Rockwall County is higher than in Texas overall and much higher than many of CSI's other service areas.
- Residents in Rockwall County participate in diabetic monitoring and mammography screenings more than the Texas average.

Health Outcomes	Texas	Rockwall County
Diabetes	9.1%	8.4%
HIV prevalence ¹⁴⁶	345	80
Premature age-adjusted mortality ¹⁴⁷	6,330	5,000
Infant mortality ¹⁴⁸	6.2	4.7
Child mortality ¹⁴⁹	17.3	27.2
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- HIV prevalence in Rockwall County is much lower than the Texas average.
- The child mortality rate in Rockwall County is lower than the State overall.

¹⁴⁵ Per 1,000 fee-for-service Medicare enrollees.

¹⁴⁶ Per 100,000 population

¹⁴⁷ Years of potential life lost before age 75 per 100,000 population (age-adjusted)

¹⁴⁸ Per 1,000 live births

¹⁴⁹ Rate per 100,00 children aged 1-14

Other Food Security and Health Factors	Texas	Rockwall County
Food insecurity	17.0%	13.6%

Service area description

A map of the Dallas-Fort Worth metropolitan area and surrounding regions. Major highways are shown with their route numbers in shields: I-75, I-35, I-20, I-40, I-67, I-10, I-15, I-28, I-37, I-45, I-55, I-69, I-70, I-77, I-80, I-82, I-84, I-86, I-88, I-90, I-94, I-96, I-98, I-100, I-105, I-110, I-115, I-120, I-125, I-130, I-135, I-140, I-145, I-150, I-155, I-160, I-165, I-170, I-175, I-180, I-185, I-190, I-195, I-200, I-205, I-210, I-215, I-220, I-225, I-230, I-235, I-240, I-245, I-250, I-255, I-260, I-265, I-270, I-275, I-280, I-285, I-290, I-295, I-300, I-305, I-310, I-315, I-320, I-325, I-330, I-335, I-340, I-345, I-350, I-355, I-360, I-365, I-370, I-375, I-380, I-385, I-390, I-395, I-400, I-405, I-410, I-415, I-420, I-425, I-430, I-435, I-440, I-445, I-450, I-455, I-460, I-465, I-470, I-475, I-480, I-485, I-490, I-495, I-500, I-505, I-510, I-515, I-520, I-525, I-530, I-535, I-540, I-545, I-550, I-555, I-560, I-565, I-570, I-575, I-580, I-585, I-590, I-595, I-600, I-605, I-610, I-615, I-620, I-625, I-630, I-635, I-640, I-645, I-650, I-655, I-660, I-665, I-670, I-675, I-680, I-685, I-690, I-695, I-700, I-705, I-710, I-715, I-720, I-725, I-730, I-735, I-740, I-745, I-750, I-755, I-760, I-765, I-770, I-775, I-780, I-785, I-790, I-795, I-800, I-805, I-810, I-815, I-820, I-825, I-830, I-835, I-840, I-845, I-850, I-855, I-860, I-865, I-870, I-875, I-880, I-885, I-890, I-895, I-900, I-905, I-910, I-915, I-920, I-925, I-930, I-935, I-940, I-945, I-950, I-955, I-960, I-965, I-970, I-975, I-980, I-985, I-990, I-995, I-1000, I-1005, I-1010, I-1015, I-1020, I-1025, I-1030, I-1035, I-1040, I-1045, I-1050, I-1055, I-1060, I-1065, I-1070, I-1075, I-1080, I-1085, I-1090, I-1095, I-1100, I-1105, I-1110, I-1115, I-1120, I-1125, I-1130, I-1135, I-1140, I-1145, I-1150, I-1155, I-1160, I-1165, I-1170, I-1175, I-1180, I-1185, I-1190, I-1195, I-1200, I-1205, I-1210, I-1215, I-1220, I-1225, I-1230, I-1235, I-1240, I-1245, I-1250, I-1255, I-1260, I-1265, I-1270, I-1275, I-1280, I-1285, I-1290, I-1295, I-1300, I-1305, I-1310, I-1315, I-1320, I-1325, I-1330, I-1335, I-1340, I-1345, I-1350, I-1355, I-1360, I-1365, I-1370, I-1375, I-1380, I-1385, I-1390, I-1395, I-1400, I-1405, I-1410, I-1415, I-1420, I-1425, I-1430, I-1435, I-1440, I-1445, I-1450, I-1455, I-1460, I-1465, I-1470, I-1475, I-1480, I-1485, I-1490, I-1495, I-1500, I-1505, I-1510, I-1515, I-1520, I-1525, I-1530, I-1535, I-1540, I-1545, I-1550, I-1555, I-1560, I-1565, I-1570, I-1575, I-1580, I-1585, I-1590, I-1595, I-1600, I-1605, I-1610, I-1615, I-1620, I-1625, I-1630, I-1635, I-1640, I-1645, I-1650, I-1655, I-1660, I-1665, I-1670, I-1675, I-1680, I-1685, I-1690, I-1695, I-1700, I-1705, I-1710, I-1715, I-1720, I-1725, I-1730, I-1735, I-1740, I-1745, I-1750, I-1755, I-1760, I-1765, I-1770, I-1775, I-1780, I-1785, I-1790, I-1795, I-1800, I-1805, I-1810, I-1815, I-1820, I-1825, I-1830, I-1835, I-1840, I-1845, I-1850, I-1855, I-1860, I-1865, I-1870, I-1875, I-1880, I-1885, I-1890, I-1895, I-1900, I-1905, I-1910, I-1915, I-1920, I-1925, I-1930, I-1935, I-1940, I-1945, I-1950, I-1955, I-1960, I-1965, I-1970, I-1975, I-1980, I-1985, I-1990, I-1995, I-2000, I-2005, I-2010, I-2015, I-2020, I-2025, I-2030, I-2035, I-2040, I-2045, I-2050, I-2055, I-2060, I-2065, I-2070, I-2075, I-2080, I-2085, I-2090, I-2095, I-2100, I-2105, I-2110, I-2115, I-2120, I-2125, I-2130, I-2135, I-2140, I-2145, I-2150, I-2155, I-2160, I-2165, I-2170, I-2175, I-2180, I-2185, I-2190, I-2195, I-2200, I-2205, I-2210, I-2215, I-2220, I-2225, I-2230, I-2235, I-2240, I-2245, I-2250, I-2255, I-2260, I-2265, I-2270, I-2275, I-2280, I-2285, I-2290, I-2295, I-2300, I-2305, I-2310, I-2315, I-2320, I-2325, I-2330, I-2335, I-2340, I-2345, I-2350, I-2355, I-2360, I-2365, I-2370, I-2375, I-2380, I-2385, I-2390, I-2395, I-2400, I-2405, I-2410, I-2415, I-2420, I-2425, I-2430, I-2435, I-2440, I-2445, I-2450, I-2455, I-2460, I-2465, I-2470, I-2475, I-2480, I-2485, I-2490, I-2495, I-2500, I-2505, I-2510, I-2515, I-2520, I-2525, I-2530, I-2535, I-2540, I-2545, I-2550, I-2555, I-2560, I-2565, I-2570, I-2575, I-2580, I-2585, I-2590, I-2595, I-2600, I-2605, I-2610, I-2615, I-2620, I-2625, I-2630, I-2635, I-2640, I-2645, I-2650, I-2655, I-2660, I-2665, I-2670, I-2675, I-2680, I-2685, I-2690, I-2695, I-2700, I-2705, I-2710, I-2715, I-2720, I-2725, I-2730, I-2735, I-2740, I-2745, I-2750, I-2755, I-2760, I-2765, I-2770, I-2775, I-2780, I-2785, I-2790, I-2795, I-2800, I-2805, I-2810, I-2815, I-2820, I-2825, I-2830, I-2835, I-2840, I-2845, I-2850, I-2855, I-2860, I-2865, I-2870, I-2875, I-2880, I-2885, I-2890, I-2895, I-2900, I-2905, I-2910, I-2915, I-2920, I-2925, I-2930, I-2935, I-2940, I-2945, I-2950, I-2955, I-2960, I-2965, I-2970, I-2975, I-2980, I-2985, I-2990, I-2995, I-3000, I-3005, I-3010, I-3015, I-3020, I-3025, I-3030, I-3035

Population: 53,070
Median Age: 43.5
Median Household Income: \$43,220
Percent Living in Poverty**: 15.7%
Ethnicity
 % White: 84.6%
 % African American: 2.5%
 % Hispanic: 10.0%
 Diversity Index: 36.2
Percent with Bachelor's Degree or higher: 16.3%
Percent 16+ unemployed: 3.3%

1. CSBG services
2. Utility assistance
3. Home weatherization

1. Transportation
2. Housing & Rental Assistance
3. Food
4. Utility assistance
5. Clothing

Research summary

- Large sample community survey
- Client surveys and interviews
- One-on-one interviews with municipal and county-level government officials
- Community focus groups
- Quantitative data analysis
- One-on-one interviews with Board Members and other community stakeholders

Needs analysis

Based on the research methodologies described above, approximately 16 needs were identified. The needs were prioritized using the Strategic Grid Analysis (SGA) format, as described in the methodology section and in the appendices. Using the SGA, the top five needs for the county are listed below:

1. Transportation
2. Housing & Rental Assistance
3. Food
4. Utility assistance
5. Clothing

Strategy grids are generally used to help focus efforts on community needs that will yield the greatest benefit and are practical for the organization to undertake. They can provide a mechanism to take a thoughtful approach to achieving maximum results with limited resources. The Strategic Grid for the county is shown below; all identified needs are included in the table with the highest priority ones shown in the top / right quadrant (High Impact / High CSI Implementation Feasibility).

Strategic Grid

County:		Van Zandt
High Community Impact Low	Employment opportunities Childcare Clothing Employment / Economic assistance	Food Help with applying for Social Security, SSDI, WIC, TANF, etc. Transportation Utility Assistance
	Programs and activities for youth (ages 1-18) Housing & Rental Assistance	Prescription assistance Programs and activities for seniors Employment and community services for Hispanics English as a Second Language Classes
Low		High
CSI Implementation Feasibility		

County demographics

Key measures

Van Zandt County residents are less ethnically diverse than many other CSI service area counties.

Key Measures	
Measure	Van Zandt
Population	53,070
Median Age	43.5
Median Household Income	\$46,555
Percent Living in Poverty:	15.7
Ethnicity	
% White	84.60%
% African American	2.50%
% Hispanic	10.00%
Percent with Bachelor's Degree or higher	16.30%
Percent 16+ unemployed	3.30%

³ Source: U.S. Bureau of Census, https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ACS_16_5YR_DP03&prodType=table	

- The percentage of residents of Van Zandt County living in poverty is higher than the average of CSI's service areas.
- Higher education attainment in Van Zandt County is much lower than the average of CSI's service areas.

Demographic and health measures

The following tables¹⁵² show detailed demographic data on measures such as:

- Age
- Gender
- Ethnicity
- Household income
- Social and economic factors
- Physical environment factors
- Health rankings
- Healthy behaviors
- Clinical care
- Health outcomes
- Other food security and health factors

Total	Age			Gender	
	Below 18	18-64	65 and older	Male	Female
53,070	23.2%	56.9%	19.9%	49.1%	50.9%

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- The median age is 43.5 – higher than the U.S. median of approximately 37 years.

Total	Ethnicity					Diversity Index
	White	African American	Asian	Hispanic	Other	
53,070	84.6%	2.5%	0.5%	10.0%	2.4%	36.2

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- More than four out of five residents in Van Zandt County are white.
- Van Zandt County has the lowest percentage of Hispanic residents of CSI's service areas.

Total Housing Units	Household Income									Poverty
	Less than \$15k	\$15k to \$24k	\$25k to \$34k	\$35k to \$49k	\$50k to \$74k	\$75k to \$99k	\$100k to \$149k	\$150k to \$199k	\$200k or more	Percent Below 100% FPL
23,896	13.7%	13.7%	10.9%	15.2%	17.1%	11.6%	11.2%	4.0%	2.6%	15.8%

Median Household Income: \$46,555

SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates

- The median income is \$46,555 – lower than the Texas median of \$54,727.

¹⁵² Robert Wood Johnson Foundation, 2015.

Social & Economic Factors	Texas	Van Zandt County
Median household income	\$54,727	\$46,555
Children eligible for free lunch	58.9%	52.6%
High school graduation	82.4%	82.3%
Some college	66.7%	57.7%
Unemployment	4.5%	3.3%
Children in poverty	23.9%	24.0%
Income inequality	4.9	4.8
Children in single-parent households	33%	26%
Social associations ¹⁵³	7.6	12.3
Violent crime ¹⁵⁴	406	185
Injury deaths ¹⁵⁵	37.5	59.5
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Two out of four children in Van Zandt County are eligible for free lunch.
- High school graduation rates in Van Zandt County are similar with the Texas average of 82%.
- Van Zandt County has a much lower rate of violent crime than the state overall.

Physical Environment	Texas	Van Zandt County
Air pollution - particulate matter ¹⁵⁶	9.5	9.3
Drinking water violations ¹⁵⁷		No
Severe housing problems	18%	15%
Driving alone to work	80.3%	81.3%
Long commute - driving alone	37%	48%
Source: County Health Rankings 2018 Texas Summary Report http://www.countyhealthrankings.org/app/texas/2018/compare/snapshot?counties=48_001%2B48_085%2B48_121%2B48_139%2B48_213%2B48_231%2B48_257%2B48_349%2B48_397%2B48_467		

- Van Zandt County has less severe housing problems than the Texas average.
- Residents in Van Zandt County are more likely to commute long distances alone than the State overall.

¹⁵³ Number of associations (membership organizations) per 10,000 population.

¹⁵⁴ Violent crimes reported per 100,000 population.

¹⁵⁵ Number of deaths from intentional and unintentional injuries per 100,000 population.

¹⁵⁶ Average daily density of fine particulate matter in micrograms per cubic meter (PM2.5) in a county.

¹⁵⁷

Health Ranking Summary Table	
Van Zandt County	Ranking (1= Best; 254 = Worst)
Overall Health Outcomes	92
Length of Life	172
Quality of Life	39
Health Behaviors	66
Clinical Care	119
Social and Economic Factors	84
Physical Environment	212
Source: County Health Rankings 2018 Texas Summary Report	

The rankings help counties understand what influences how healthy residents are and how long they will live. The rankings are unique in their ability to measure the current overall health of each county in Texas. They also look at a variety of measures that affect the future health of communities, such as high school graduation rates, access to healthy foods, rates of smoking, obesity, and teen births.

Health Behaviors	Texas	Van Zandt County
Adult smoking	16.5%	20.8%
Adult obesity	27.9%	30.0%
Food environment index ¹⁵⁸	6.0	7.1
Physical inactivity	22.9%	31.5%
Access to exercise opportunities	81%	45%
Excessive drinking	15.8%	10.5%
Alcohol-impaired driving deaths	33%	26%
Sexually transmitted infections ¹⁵⁹	523	207
Teen births ¹⁶⁰	55	51
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Obesity is a key driver for many chronic diseases and other health conditions. Van Zandt County residents are more likely to be obese than the Texas average.

¹⁵⁸ The Food Environment Index ranges from 0 (worst) to 10 (best) and equally weights two indicators of the food environment. 1) Limited access to healthy foods estimates the percentage of the population who are low income and do not live close to a grocery store. 2) Food insecurity estimates the percentage of the population who did not have access to a reliable source of food during the past year.

¹⁵⁹ Rate per 100,000 people.

¹⁶⁰ Rate per 100,000 people.

- Behaviors related to physical activity in Van Zandt County are disadvantageous compared to the Texas average.

Clinical Care and Rank	Texas	Van Zandt County
Uninsured	19.3%	20.8%
Primary care physicians	1,670:1	5,350:1
Dentists	1,790:1	3,880:1
Mental health providers	1,010:1	3,400:1
Preventable hospital stays ¹⁶¹	54.3	66.6
Diabetic monitoring	83.8%	85.0%
Mammography screening	57.9%	60.7%
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- The concentration of healthcare providers in Van Zandt County is much lower than in Texas overall.
- Primary care physicians are particularly lacking in the area.

Health Outcomes	Texas	Van Zandt County
Diabetes	9.1%	8.6%
HIV prevalence ¹⁶²	345	52
Premature age-adjusted mortality ¹⁶³	6,330	9,205
Infant mortality ¹⁶⁴	6.2	7.5
Child mortality ¹⁶⁵	17.3	31.9
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- HIV prevalence is much lower in the area than the State overall.

¹⁶¹ Per 1,000 fee-for-service Medicare enrollees.

¹⁶² Per 100,000 population

¹⁶³ Years of potential life lost before age 75 per 100,000 population (age-adjusted)

¹⁶⁴ Per 1,000 live births

¹⁶⁵ Rate per 100,00 children aged 1-14

Other Food Security and Health Factors	Texas	Van Zandt County
Food insecurity	17.0%	18.3%
Low food access	27.0%	29.4%
Motor vehicle crash deaths	13.6	25.8
Drug poisoning deaths ¹⁶⁶	N/A	15.9
Uninsured adults	23.3%	25.2%
Uninsured children	10%	13%
Health care costs ¹⁶⁷	\$11,121	\$11,100
SOURCE: U.S. Bureau of Census, 2012-2016 American Community Survey 5-Year Estimates		

- Residents in Van Zandt County have higher food insecurity than the Texas average.
- Van Zandt County has a higher percentage of residents that are uninsured than the Texas average.
- The concentration of primary care providers in Van Zandt County is extremely low.

¹⁶⁶ Per 100,000 population

¹⁶⁷ Amount of price-adjusted Medicare reimbursements per enrollee

Linkage to Ongoing Activities

As per the Federal requirements for needs assessments, CSI will use the CNA to spearhead its efforts to define and implement a Community Action Plan designed to enhance services to the counties it serves – especially those in poverty and other underserved populations. See inset below.

Federal Requirements for Needs Assessments

As per the TDHCA's Guidance

"In 2001, the U.S. Department of Health and Human Services ("USHHS") issued Information Memorandum 49, requiring eligible entities to conduct needs assessments and use the results to design programs to meet community needs. In 2015, USHHS issued Information Memorandum No. 138 establishing Community Services Block Grant (CSBG) Organizational Standards requiring CAAs to conduct a Community Needs Assessment and develop a Community Action Plan to address the needs identified in the needs assessment.

"At a minimum, CAAs must conduct Community Needs Assessments that meet the following requirements established by the Organizational Standards:

<i>Standard</i>	<i>Summary of Community Needs Assessment Requirements</i>
3.1	Conduct it every 3 years
3.2	Collects current poverty data and its prevalence related to gender, age, and race/ethnicity
3.3	Collects and analyzes both qualitative and quantitative data on its service areas
3.4	Includes key findings on the causes and conditions of poverty and the needs
3.5	Governing board formally accepts the completed assessment
4.2	Informs an outcome-based and anti-poverty focused Community Action Plan
6.4	Customer satisfaction data and input identified is considered in the strategic planning process"

TDHCA Submission Requirements

Community Needs Assessment Results Overview

The Community Services Block Grant (CSBG) Act requires States administering this grant to secure a Community Needs Assessment from CSBG eligible entities. Subrecipients must submit this Community Needs Assessment Results Overview along with a 2018 CSBG Community Needs Assessment (CNA) Report by June 1, 2018. CSI referred to the Develop a CNA Report section in TDHCA guidance for creating the CNA report.

CSI Organizational Strengths, Assets, and Challenges

The recent CS Strategic Planning process resulted in the following information required for the Community Needs Assessment:

Organizational Strengths	Challenges	Opportunities and Assets
Expansive, well-run programs.	Engagement from some community sectors needs to be enhanced.	Alignment of resources to support a more highly refined list of community needs.
Highly focused strategic plan and the supporting operational plans.	Incremental funding for new programs designed to meet evolving needs is highly competitive or not a good fit with CSI's current mission or scope.	Greater collaboration with community partners to cooperatively administer programs that support high-need populations.
Strong Board of Directors.	Highly qualified staff members are occasionally lured to other employers due to financial or other reasons.	Potentially expand staff in order to more effectively meet community needs.
Recently revised and improved policies and procedures.	Capacity is often strained due to the magnitude of the needs in the community.	Pursue additional funding sources (possibly in collaboration with appropriate community partners) and develop additional strategic programs.
High client satisfaction.		Continue to work with TDHCA and other CAAs to identify best practices and opportunities to continually enhance service to the community.
Well-trained staff members able to "where many hats" and support diverse program activities; the staff flexibility to meet evolving needs.		

Assessment Approval

The Community Services, Inc. Community Needs Assessment, as per TDHCA requirements was approved by the Agency Board of Directors on May 29, 2018 during its monthly meeting.

Appendices

This document includes the following appendices:

- Client Survey Instrument
- Interview of Organizations/Community Forums
- Community Survey Instrument
- Leadership Group Discussion Guide/ Forum Questions

Client Survey to Evaluate Services

Agency Name: _____

City and County where you live: _____

Age (optional): _____

Survey Purpose: We need your feedback to help improve our services and plan future services.

1. Please place an X next to the service(s) received from our agency:

___ Meals on Wheels ___ Transit ___ Food
___ Other Emergency Assistance ___ Employment Related Assistance ___ Rent Assistance
___ Education Related Assistance ___ Case Management ___ Referral
___ Other Services – please explain: _____

2. Describe how satisfied you are with the services you received from our agency by circling the rating which best describes your experience:

Rating Topics	No Opinion 0	Poor 1	Fair 2	Good 3	Excellent 4
1. How did staff treat you?	0	1	2	3	4
2. Did staff do what they said they would do to assist you?	0	1	2	3	4
3. Did staff assist you in a timely manner?	0	1	2	3	4
4. How was your overall service experience?	0	1	2	3	4

3. What are the three biggest unmet community needs in the county?

- a. _____
- b. _____
- c. _____

4. Do you have any recommendations to improve how we serve you?

Interview of Organizations/Community Forums

Organization: _____ Date of interview: _____

Name of Representative for Organization: _____

City and County Organization is Located: _____/_____

_____ (agency name) is conducting a Community Needs Assessment as part of the requirements to receive Community Services Block Grant funds from the Texas Department of Housing and Community Affairs. As part of the survey, we are interviewing key stakeholders in the community.

1. **What do you know about our Community Action Agency and the services we provide that help address needs of low-income persons?** (Note: persons that aware of what the agency does, do not need to answer question #1 in the in person interview.)

2. What do think are the top five key needs of low-income persons in the community?
The needs could be in the areas of employment, education, income management, housing, emergency assistance/services, nutrition, helping persons to become self-sufficient, or coordination of services and connecting persons to services, community revitalization, or other needs.
 - 1)
 - 2)
 - 3)
 - 4)
 - 5)
3. Is your organization currently addressing any of the needs that you identified? If yes, please specify which are being addressed and how?

4. How can our agency partner with your organization to address the needs that you identified?

5. Do you have any other feedback?

- ☐ Food assistance
- ☐ Home weatherization
- ☐ Other emergency assistance
- ☐ Employment related assistance
- ☐ Rent assistance
- ☐ Education related assistance
- ☐ Case management
- ☐ Referral service
- ☐ Other

Leadership Group Discussion Guide/ Forum Questions

Purpose: This community-wide forum is held to obtain your feedback on the needs of low-income persons and to get your suggestions on how our agency and community can better address the needs.

Explanation of Community Needs Assessment: As a requirement of the receipt of Community Services Block Grant funds which are utilized by our organization to provide services such as [LIST SERVICES PROVIDED], we are conducting surveys, interviews, focus groups, and forums to help us identify community needs in key areas such as employment, education, housing, health, emergency assistance, nutrition, transportation, and other areas and to identify barriers and resources.

The format for the Forum: We will pose some questions and open up the floor for persons to raise their hands and provide their input. You can provide your input either from where you are seated or come to the microphone and speak. We will record your input.

Discussion Areas:

1. What are some of the greatest needs that low-income persons face in our community?
2. Of the needs that we have identified, what do you think are the top 5 needs (rank from 1 through 5)?
 - 1)
 - 2)
 - 3)
 - 4)
 - 5)
3. **What top three community improvements do you think our agency or the community should focus on?** *The improvements could be in areas such as job creation, affordable housing, accessible and affordable health care, affordable child care, transportation, education or training, community facilities, community services, commercial services, etc.*
